

PAPER AIRPLANE FOLD TEMPLATE

The Classic Dart

Print on regular 8.5 x 11 paper. Start with this side facing up and the point at the top.

Follow the numbers. The dashed lines show where to fold.

HOW TO FOLD IT

1. Fold the paper in half the long way. Crease it, then open it back up.
2. Fold both top corners in to the center line.
3. Fold both slanted edges in to the center line.
4. Fold the plane in half, with the folds on the inside.
5. Fold each wing down so its top edge lines up with the bottom of the body.
6. Hold it near the front and throw it level, not up.
